INHERITED EYE DISEASE STATUS – SCHEDULE A BREEDS ONLY

This section applies only to those conditions in the breeds specified in Schedule A of the Procedure Notes current on the day of examination. These results will be sent to the Kennel Club and/or ISDS as appropriate.

| CONGENITAL                                                       | CLINICALLY UNAFFECTED    | CLINICALLY AFFECTED      | NON-CONGENITAL                                 | CLINICALLY UNAFFECTED    | CLINICALLY AFFECTED      |
|------------------------------------------------------------------|--------------------------|--------------------------|------------------------------------------------|--------------------------|--------------------------|
| (CEA) Collie eye anomaly<br>– choroidal hypoplasia<br>– coloboma | <input type="checkbox"/> | <input type="checkbox"/> | (GPRA) Generalised progressive retinal atrophy | <input type="checkbox"/> | <input type="checkbox"/> |
| (MRD) Multifocal retinal dysplasia                               | <input type="checkbox"/> | <input type="checkbox"/> | (CPRA) Central progressive retinal atrophy     | <input type="checkbox"/> | <input type="checkbox"/> |
| (TRD) Total retinal dysplasia                                    | <input type="checkbox"/> | <input type="checkbox"/> | (HC) Hereditary cataract                       | <input type="checkbox"/> | <input type="checkbox"/> |
| (CHC) Congenital hereditary cataract                             | <input type="checkbox"/> | <input type="checkbox"/> | (PLL) Primary lens luxation                    | <input type="checkbox"/> | <input type="checkbox"/> |
| (PHPV) Persistent hyperplastic primary vitreous                  | <input type="checkbox"/> | <input type="checkbox"/> |                                                |                          |                          |
| (G) Goniodysgenesis                                              | <input type="checkbox"/> | <input type="checkbox"/> |                                                |                          |                          |

The age of onset of non-congenital inherited eye disease varies in different breeds and between individual dogs. It is therefore important to follow any advice given at the time of this examination with regard to the necessity for and frequency of eye examination under the Scheme.

Retesting under the BVA/KC/ISDS scheme advised in \_\_\_\_\_

'Clinically affected' signifies that there is evidence of the inherited disease(s) specified, whereas 'Clinically unaffected' signifies that there is no such evidence

I have today examined the above animal under the BVA/KC/ISDS eye scheme with the results as shown

Signed N.J. Burden Name N.J. Burden Date 8/8/13
